

Student Persistence

This document contains a series of slides highlighting the persistence patterns of Cañada students.

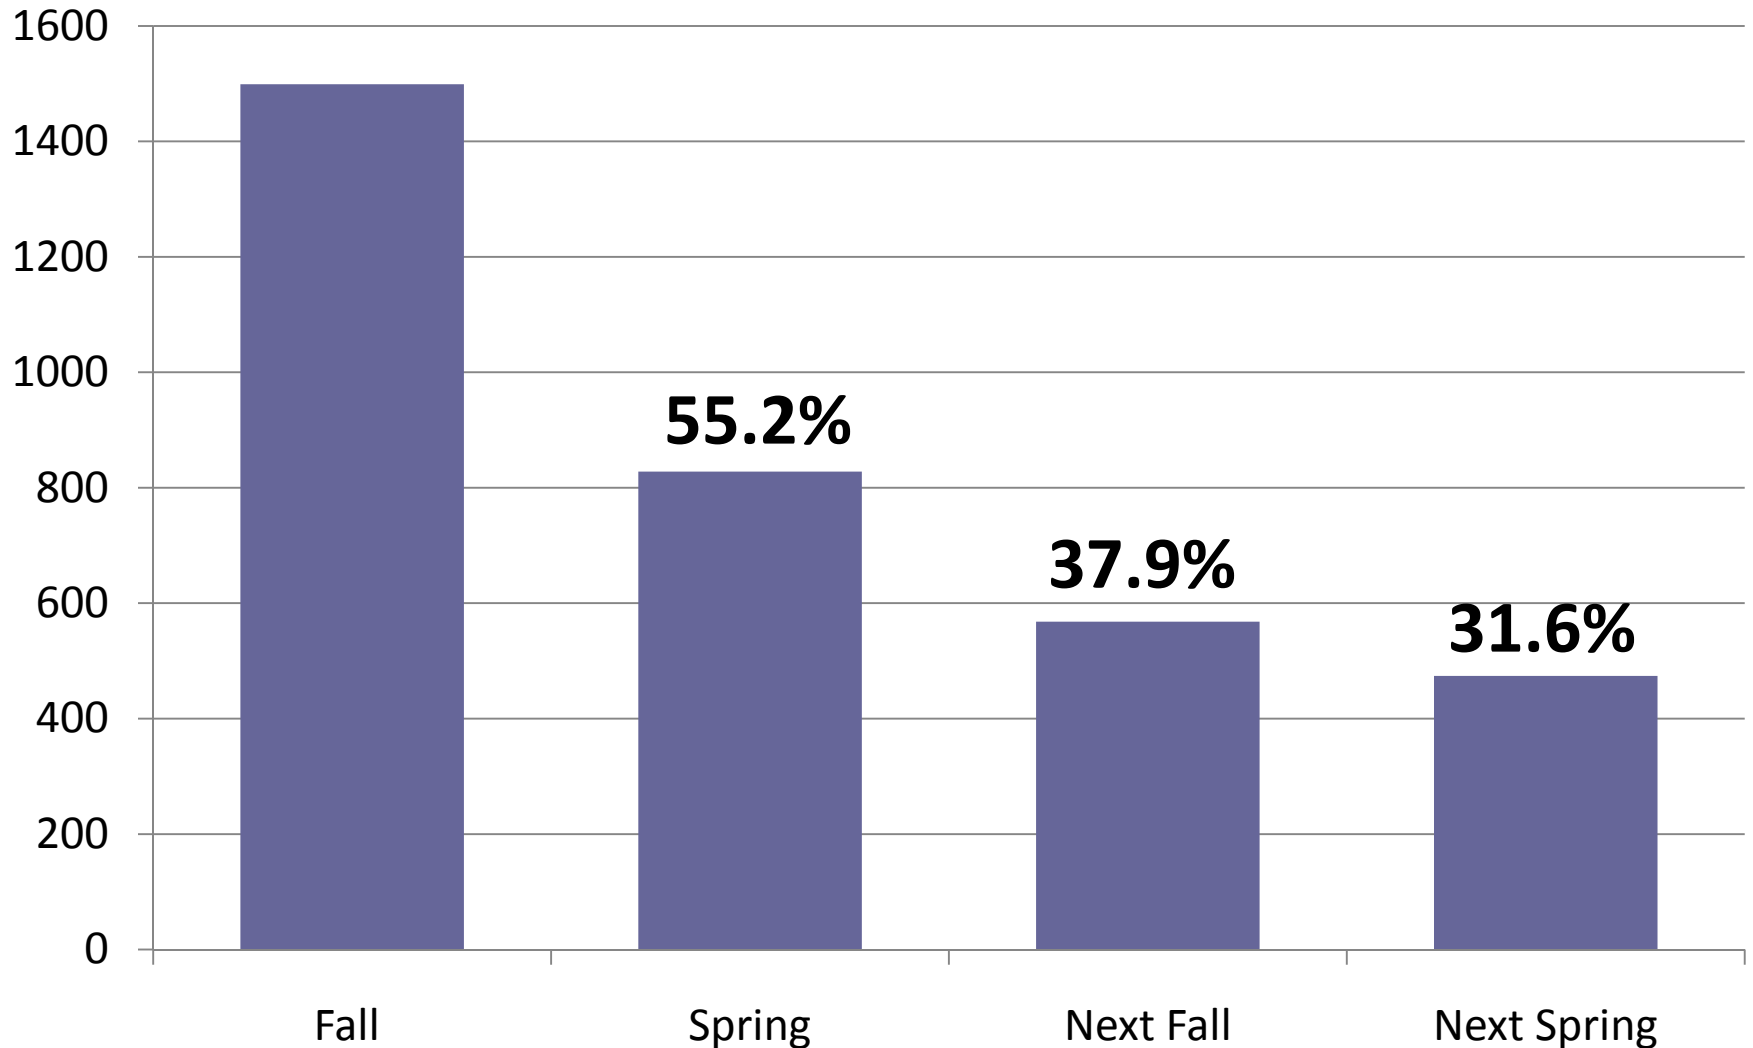

This draft is an early sample of output from a broader research effort underway into the nature of student persistence and the relationships between high persistence and student interactions with the institution

Average Persistence Rates for Cañada College

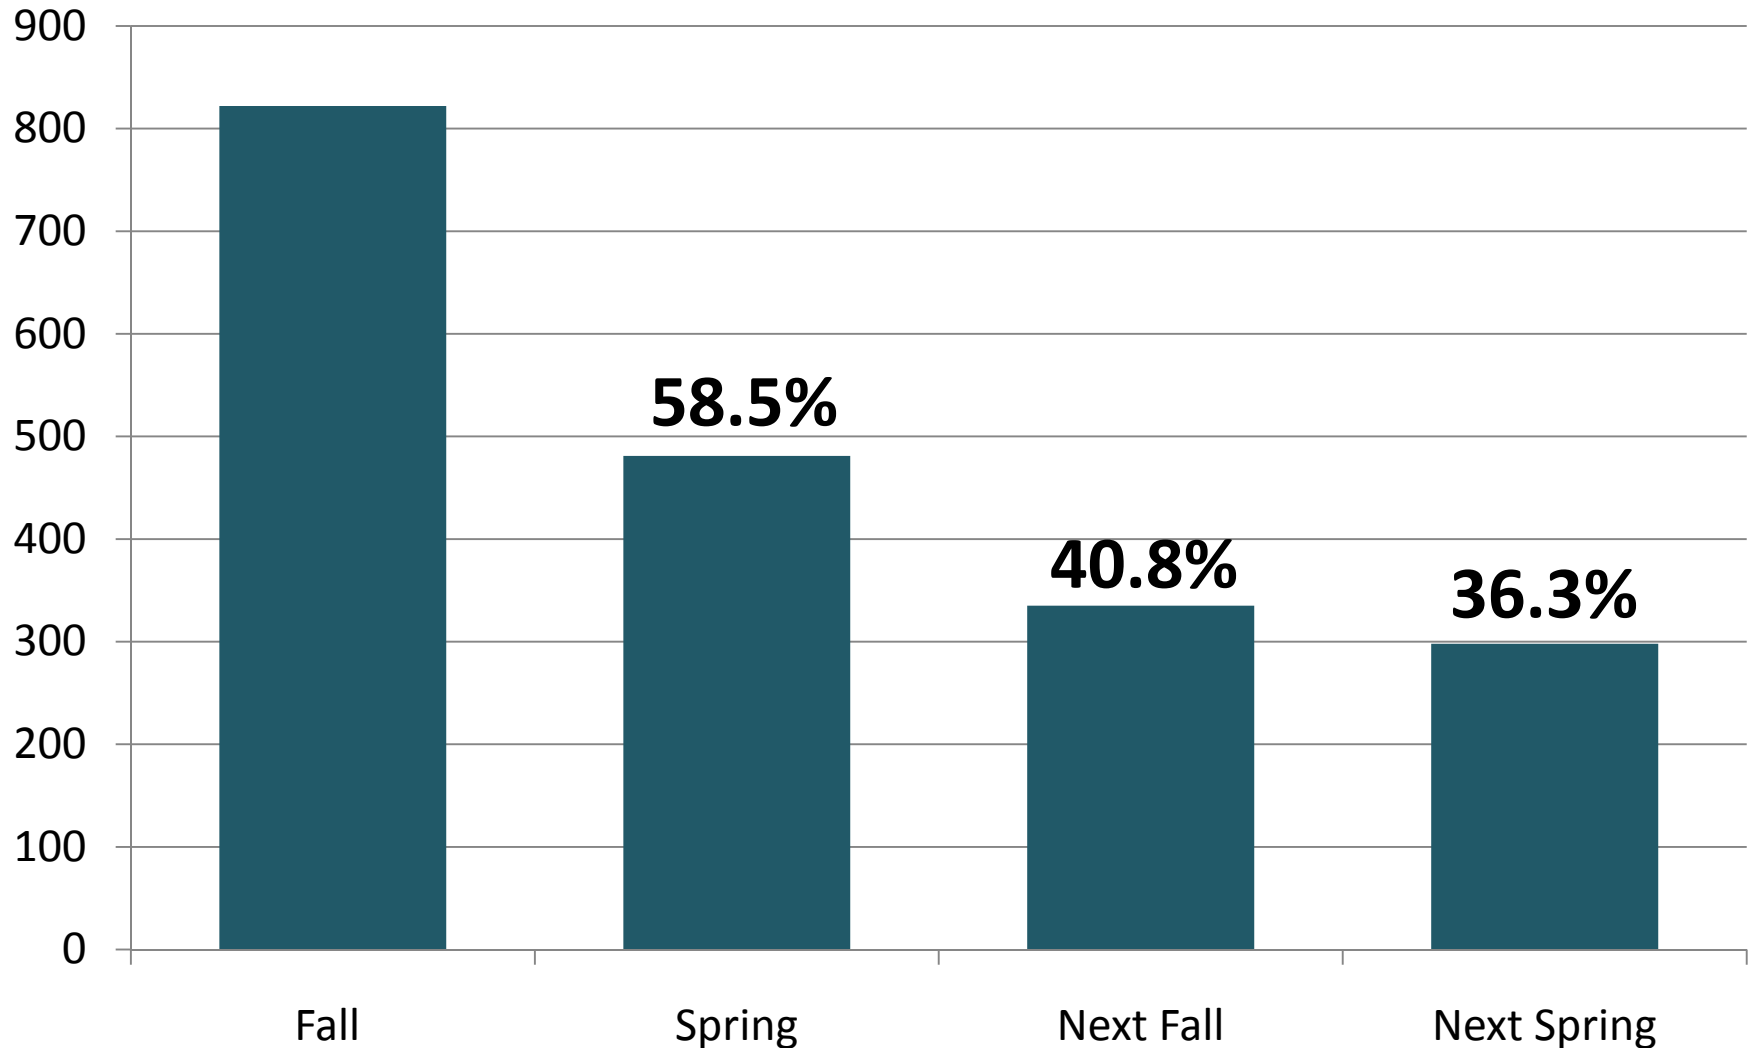

Note: Percentages are calculated based on a three year average over the period (Fall 2006 – Spring 2010).

Average Persistence Rates of First Time Students at Cañada College

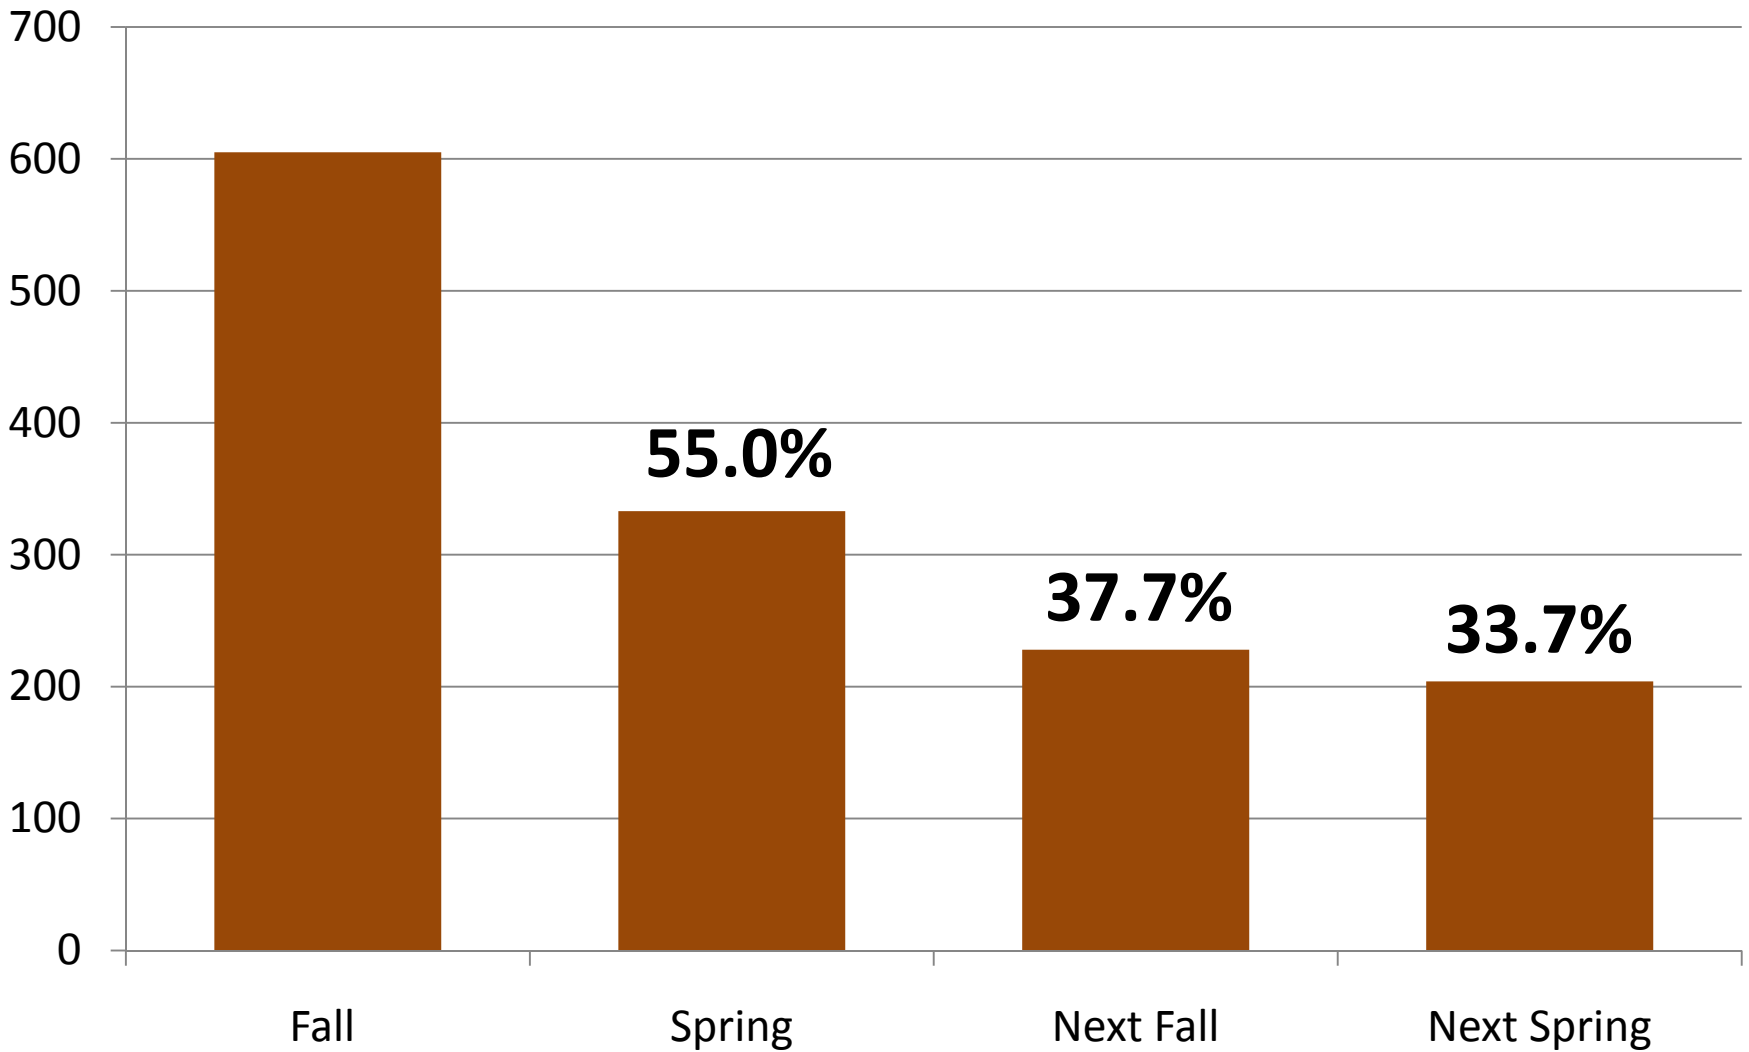

Note: Percentages are calculated based on a three year average over the period (Fall 2006 – Spring 2010).
