College of San Mateo Furniture Finishes
Design Standard

PART 1 GENERAL

1.1 PURPOSE:

San Mateo County Community College District engaged various industry specialists and end-users to establish architectural and furniture finish standards to be applied to capital construction projects. The outcome of this initiative was the identification of a palette of inspirational, timeless and sustainable building and furnishing materials, providing a holistic approach to the campus environment. The products selected were carefully evaluated, tested and approved following a rigorous shared governance process. These furniture finish standards should be applied to all new construction, modernization, renovation and replacement projects at College of San Mateo. *07/01/2019 Update: Furniture finishes standards are for existing furniture replacements. A/E to propose furniture design/finish from District approved vendor for ALL refresh projects, modernization projects and new building projects.*
