

SKYLINE COLLEGE – BUILDING 5 LEARNING RESOURCE CENTER TECHNOLOGY AND ENVIRONMENTAL UPGRADE

Project description: This IPP proposes to address program issues related to the library/LRC. Substantial changes in the technologies supporting library and LRC programs have occurred rapidly during the last 10 years. This project addresses these changes by reconfiguring spaces to incorporate techno-media-internet elements into the program. In addition, the project incorporates energy saving technologies, sustainability and, in general, reduction of operating costs of this high cost building. The project also results in reestablishment of points of access/egress to respond to the preferred path used by students to get to the parking lots; use of the single door at the loading dock has resulted in a potential danger to students who seek the shortest distance to the lot.

Total Project Cost: The total project cost is \$19.181 million, with \$13.427 million requested State Capital Outlay funding, supplemented by approximately \$5.754 million in local funds.

Status: If the CCCCOC approves this IPP, an FPP will be developed and submitted as part of the 2017-2018 planning process. Funding sources for Fiscal Year 2017-2018 FPP's have not yet been confirmed.

IV. Locally funded current and future projects

CAÑADA COLLEGE – BUILDING 1 DEMOLITION AND NEW CENTER FOR KINESIOLOGY AND DANCE

Project Description: The CCCCOC previously approved this FPP under the project name "Building 1 Physical Education Conversion & Code Compliance Upgrade." At the request of the College, the FPP was revisited prior to re-submittal in 2011 to ensure that it reflected the current needs and priorities of the College, and was renamed as part of this process. Upon further study, staff has determined that the facility requirements associated with the College's planned instructional programs will exceed the limitations of the State Capital Outlay Process, particularly the inclusion of an Aquatics Complex in the project. In view of the desired scope for this project, the growing backlog of projects in the queue for Capital Outlay funding, and continuing indications from the CCCCOC that physical education projects will not be prioritized for funding, the administration has elected to remove this project from the Capital Outlay funding queue, and to utilize future local general obligation bond funds to insure the project meets the needs of the institution. Consideration is being given to demolition and replacement of Building 1, in lieu of renovation of the existing 43 year old Building. Programs housed in this facility will allow completion of certificate degrees and transfers in Kinesiology, Fitness Professional, and Dance. The project will include appropriate locker rooms to meet accessibility codes and to comply with Title IX¹ requirements. In addition, this project will add a classroom dedicated to the advancement of the Kinesiology and Fitness Professional programs.

Total Project Cost: A conceptual cost estimate for this project is approximately \$40.700 million, to be funded by a future general obligation bond.

Status: Design will commence upon voter approval of a future general obligation bond.
