

## MAINTENANCE ENGINEER

### A. General Statement

This is journeyman-level work involved in complex installation, repair and maintenance of mechanical, plumbing, electrical, vertical transportation, telecom/datacom, roofing and building envelope, structural, access control, interior floor/wall/ceiling, building monitoring, control, and other support systems for community college facilities. Under general supervision, the Maintenance Engineer works individually or as a team member to plan and implement major and minor installations, modifications and repairs to buildings, vehicles, equipment and grounds. Public contact is extensive, primarily involving department and outside staff, vendors and contractors for the purpose of exchanging information pertaining to project assessment, procedures, materials and timelines. A moderate to high degree of independent judgment and creativity is required to follow and modify standard, prescribed trade techniques to troubleshoot, complete given assignments, and to resolve minor and some major problems that arise. Consequences of errors in judgment can be costly in materials, public relations and in employee time. A Maintenance Engineer can direct the work of student assistants and other staff as assigned.

### B. Examples of Essential Functions

#### A Maintenance Engineer

1. exchanges information with lead and/or management, maintenance and other staff regarding ongoing and special maintenance projects, project priorities, materials, staffing, and timelines required; confers with management regarding safety procedures, equipment, supplies; provides information on repair and installation needs, as technical resource, to outside department staff; attends workshops, meetings and other events to obtain current information;
2. installs, adjusts, modifies and repairs building systems and campus infrastructure systems; assesses condition of fixtures and parts; replaces parts and makes recommendations for and/or executes the purchase of new parts and supplies; works with contractors to complete a variety of projects, as assigned; schedules and monitors the work of other staff as assigned;
3. services, repairs and maintains vehicles and equipment according to a maintenance schedule;
4. directs and participates in cleaning and painting of paintable surfaces; performs routine inspections on a regular basis for proper working order; checks, adjusts, repairs and monitors building systems, furniture and fixtures for proper operation standards; inventories supplies and recommends and/or executes the purchase of replacement or additional supplies as needed;
5. drives a motor vehicle to various work sites and to pick up and deliver materials and equipment;
6. cleans and maintains the maintenance center and related work areas;
7. uses a computer and computer software to enter, modify and retrieve data related to maintenance schedules, equipment and supply usage and inventory, and other data;

### C. Non-essential Functions

1. Performs other related duties as assigned.

MAINTENANCE ENGINEER (continued):

D. Knowledge, Skills and Abilities
