ILO Assessment for 2011-12

Background Explanation

The College conducted a Student Satisfaction and Engagement survey (CCSSE) in Spring 2012. Of the 172 respondents, there were 36 students who reported having completed 45 or more units of coursework. These students represent those closest to graduation and those most likely to have been positively impacted by the college's instructional programs. The responses of these students are summarized in the analysis below.

It is critical to note that the CCSSE survey is designed to identify students' behaviors and their perceptions of the institution. Although the survey does not assess student performance of ILOs, It can serve as a "proxy" for determining whether students perceive that the college "has delivered" on its claims that its students will achieve the four institutional learning outcomes.

ILO 1: Select, evaluate, and use information to engage in creative problem solving, investigate a point of view, support a conclusion, or engage in creative expression.

Mean Score	% Support
3.11 ± 0.17	77 ± 10

very often/much (4), often/quite a bit (3), sometimes/some (2), never/very little (1)
% Support = very often + often

Strengths:

- Students report that their college coursework frequently emphasizes critical thinking and deconstructive analysis (5b, 12e). They also report that significant emphasis is place on using or applying information in novel ways (5c, 5e, 5f).

Opportunities for improvement:

- Although students report that their coursework emphasizes the analytical skill of identifying the basic components of an idea/theory (5b), there is less evidence that courses emphasize the skill of making judgments and evaluation (5d).

Critical & Creative Thinking-related questions	Mean score	%Support
4d. In your experiences at this college during the current year, how often have you done each of the following? Worked on a paper or project that required integrating ideas or information from various sources	2.92	67
5b. During the current school year, how much has your coursework emphasized the following mental activities? Analyzing the basic elements of an idea, experience or theory	3.23	89
5c. During the current school year, how much has your coursework emphasized the following mental activities? Synthesizing and organizing ideas, information, or experiences in new ways	3.11	78
5d. During the current school year, how much has your coursework emphasized the following mental activities? Making judgments about the value or soundness of information, arguments or methods	2.86	61
5e. During the current school year, how much has your coursework emphasized the following mental activities? Applying theories or concepts to practical problems or in new situations	3.11	81
5f. During the current school year, how much has your coursework emphasized the following mental activities? Using information you have read or heard to perform a new skill	3.19	78
12e. During the current school year, how much has your coursework emphasized the following mental activities? Thinking critically and analytically	3.34	83

6a. During the current school year, about how much reading and writing have you done? Number of assigned textbooks, manuals, books, or book-length packs of course readings	None	1 to 4	5 to 10	11 to 20	>20
	5.7%	54.3%	17.1%	8.6%	14.3%

ILO 2: Use language to effectively convey an idea or set of facts, including the ability to use source material and evidence according to institutional and discipline standards.

Mean Score	% Support
2.89 ± 0.31	65 ± 14

very often/much (4), often/quite a bit (3), sometimes/some (2), never/very little (1)
% Support = very often + often

Strengths:

- Students report that their coursework emphasizes strong writing skills involving synthesis and creativity (4d, 5c, 12c).

Opportunities for improvement:

- Although students report that their coursework encourages effective oral communication (12d), there is less evidence that students are being asked to do so in formal presentations (4b). Effective communication through oral presentation is a critical skill for success in any workplace and should be more strongly encouraged.
- Students report having spent significant time writing however the number of documents they produce in a year is quite low (6c).

Communication Skills-related questions	Mean score	%Support
4b. In your experiences at this college during the current year, how often have you done each of the following? Made a class presentation	2.36	42
4d. In your experiences at this college during the current year, how often have you done each of the following? Worked on a paper or project that required integrating ideas or information from various sources	2.91	67
5c. During the current school year, how much has your coursework emphasized the following mental activities? Synthesizing and organizing ideas, information, or experiences in new ways	3.11	78
12c. During the current school year, how much has your coursework emphasized the following mental activities? Writing clearly and effectively	3.11	71
12d. During the current school year, how much has your coursework emphasized the following mental activities? Speaking clearly and effectively	2.97	66

6c. During the current school year, about how much reading and writing have you done? Number of written papers or reports of any length	None	1 to 4	5 to 10	11 to 20	>20
	11.4%	48.6%	5.7%	11.4%	22.9%

ILO 3: Understand and interpret various points of view that emerge from a diverse world of peoples and cultures.

Mean Score	% Support
2.96 ± 0.18	67 ± 10

very often/much (4), often/quite a bit (3), sometimes/some (2), never/very little (1)
 % Support = very often + often

Strengths:

- Students perceive that the college encourages interaction between its diverse student community and that a significant amount of their coursework emphasizes understanding people of different ethnicities (9c, 12k). Students report that they often take advantage of opportunities to engage in conversations with people who differ from themselves by ethnicity (4s).

Opportunities for improvement:

- Although students report to frequently interacting with people of different ethnicities, there is less evidence that students are as aware of, or are interacting with people exemplifying, other types of diversity such as religious beliefs, political positions, or personal values (4t).

Understanding Society & Culture-related questions	Mean score	%Support
4f. In your experiences at this college during the current year, how often have you done each of the following? Worked with other students on projects during class	2.89	67
4g. In your experiences at this college during the current year, how often have you done each of the following? Worked with classmates outside of class to prepare class assignments	2.77	57
4r. In your experiences at this college during the current year, how often have you done each of the following? Discussed ideas from your readings or classes with others outside of class	2.97	69
4s. In your experiences at this college during the current year, how often have you done each of the following? Had serious conversations with students of a different race or ethnicity	3.06	72
4t. In your experiences at this college during the current year, how often have you done each of the following? Had serious conversations with students who differ from you in religious beliefs, political opinions, or personal values	2.78	56
9c. How much does this college emphasize each of the following? Encouraging contact among students from different economic, social and racial or ethnic backgrounds	3.28	83
12k. During the current school year, how much has your coursework emphasized the following mental activities? Understanding people of other racial and ethnic backgrounds	2.94	62

ILO 4: Represent complex data in various mathematical forms (e.g., equations, graphs, diagrams, tables, and words) and analyze these data to make judgments and draw appropriate conclusions.

Mean Score	% Support
3.13 ± 0.25	73 ± 11

very often/much (4), often/quite a bit (3), sometimes/some (2), never/very little (1)
 % Support = very often + often

Strengths:

- Students perceive that the college has significantly challenged them to engage in critical thinking, analysis, and mathematical problem solving.

Scientific & Quantitative Reasoning-related questions	Mean score	%Support
5d. During the current school year, how much has your coursework emphasized the following mental activities? Making judgments about the value or soundness of information, arguments or methods	2.86	61
12e. During the current school year, how much has your coursework emphasized the following mental activities? Thinking critically and analytically	3.34	83
12f. During the current school year, how much has your coursework emphasized the following mental activities? Solving numerical problems	3.20	74
