

Office lights left  
on overnight use  
enough energy  
in a year to  
heat a home for  
almost 5 months.

**Switch them off  
and you'll make  
all the difference.**

Based on typical small office floor area of 100m<sup>2</sup> using 18 x 70W (6ft T8 fluorescent tubes) x 14 hours x 365 days = 6438.6kWh. Average annual energy use to heat a three bed semi-detached home = 16308kWh/12 months x 5 months = 6795kWh. For full calculation see <http://www.carbontrust.com/posters>.
